

# PSYC 3001 Advanced Psychological Measurement

Miles Bore

Ken Sutton, Stefania Paolini, Bill Budd

## TABLE OF CONTENTS

<b>Introduction .....</b>	<b>4</b>
What is psychological measurement? .....	5
Types of psychological measurement: .....	5
<b>Psychometric Testing.....</b>	<b>5</b>
Tests .....	5
Purpose of Tests .....	5
Where are tests used?.....	5
How many tests are there? .....	6
International Test Commission (ITC) .....	6
Test Development .....	6
Why tests need to be developed? .....	7
Define what is to be measured .....	8
Scaling Methods.....	8
Item Construction.....	10
Item Bank .....	11
Instructions.....	13
Trialling the Test.....	15
Data Management.....	15
Item Analysis: Ability Tests .....	16
Intelligence Testing .....	18
Surface Variables .....	18
Latent Variables.....	18
Types of Tests .....	18
Type by Administration .....	19
What is Intelligence.....	19
Can we define Intelligence?.....	21
Are tests ‘Good’ or ‘Bad’? .....	21
Issues in IQ research .....	22
<b>Item Analysis, Reliability and Measurement Error .....</b>	<b>22</b>
Item Analysis: Ability tests.....	22
Acceptable item difficulty .....	22
Item-Reliability Index.....	22
Corrected Item-Total Correlations .....	23
Measurement Error .....	23
Sources of Error.....	24
Reliability.....	24
Temporal Stability .....	24
Alternate Forms Reliability.....	25
Reliability as Internal Consistency .....	26
Split-Half Reliability.....	26

Coefficient Alpha.....	27
Interscorer Reliability.....	28
Restriction of Range Issue.....	28
<b>Sampling, Norms, Transformations and Biases .....</b>	<b>29</b>
<b>Norm Referenced Tests .....</b>	<b>30</b>
<b>Standardisation .....</b>	<b>31</b>
<b>Distribution of scores .....</b>	<b>32</b>
<b>Response Styles .....</b>	<b>36</b>
Personality Test Response Styles.....	36
Social Desirability.....	37
Acquiescence.....	37
<b>Test Bias.....</b>	<b>38</b>
<b>Test Fairness .....</b>	<b>39</b>
<b>Test Validity.....</b>	<b>39</b>
<b>Evidence of validity .....</b>	<b>40</b>
Face “Validity” .....	40
Content Validity .....	41
Construct Validity.....	41
Criterion-Related Validity.....	45
<b>Validity Summary .....</b>	<b>47</b>
<b>Interviewing .....</b>	<b>48</b>
<b>Different Types of Interviews .....</b>	<b>48</b>
<b>The Structure of the Interview .....</b>	<b>48</b>
The Structured Interview .....	48
The Semi-structured Interview .....	49
The Unstructured Interview.....	49
<b>The Selection Interview .....</b>	<b>49</b>
The Nature of Selection Interviews .....	49
Structured Interview Questions.....	50
Really Bad Interview Questions .....	50
<b>Job Analysis.....</b>	<b>50</b>
<b>Competency Analysis and Assessment .....</b>	<b>50</b>
Competency Model: Skills.....	51
Competency Model: Knowledge.....	51
Competency Model: Attributes.....	51
<b>Panel Interviewing.....</b>	<b>51</b>
<b>Discrimination in Selection Interviews (EEO) .....</b>	<b>52</b>
<b>Interview Data and a Selection Decision.....</b>	<b>52</b>
<b>Psychometric Case Study .....</b>	<b>52</b>
<b>IRT.....</b>	<b>66</b>
<b>Factor Analysis .....</b>	<b>72</b>
<b>Cross Culture Biases in Assessment.....</b>	<b>82</b>
<b>Culture, test performance and majority bias .....</b>	<b>82</b>
Culture and Behaviour .....	82
Culture and Behaviour summarising on inbuilt majority bias.....	84

<b>Group differences and test bias.....</b>	<b>85</b>
<b>Threats to test validity (often underpinning spurious group differences).....</b>	<b>87</b>
<b>Managing group differences in test development and test use .....</b>	<b>90</b>
<b>Test fairness in using test results .....</b>	<b>92</b>
<b>Psychophysiological Measurement.....</b>	<b>94</b>
<b>    Overview.....</b>	<b>94</b>
Defintions .....	94
Summary.....	95
Prerequisites .....	96
<b>    Possible Psychological <math>\Psi</math> and Physiological <math>\Phi</math> relationships.....</b>	<b>97</b>
<b>    Psychophysiological Inference .....</b>	<b>98</b>
<b>    Psychophysiological Measures.....</b>	<b>99</b>
<b>    PNS measures.....</b>	<b>101</b>
<b>    CNS measures.....</b>	<b>108</b>
<b>Qualitative Methods.....</b>	<b>121</b>
Aims/objectives .....	121
What is qualitative research?.....	121
Quantitative vs. Qualitative .....	122
Philosophy .....	124
Critiques of qualitative methods.....	125
Qualitative Questions.....	127
Constructionist methods.....	127
Contextualist methods.....	128
Grounded Theory.....	128
<b>INTERPRETIVE PHENOMENOLOGICAL ANALYSIS (IPA) .....</b>	<b>129</b>
Realist approach Interpretive Phenomenological Analysis (IPA).....	131
IPA VS. discourse analysis .....	132
IPA process - Interview.....	132
Basic principles of IPA: a summary .....	133
<b>Triangulation .....</b>	<b>134</b>
Method triangulation.....	135
Data triangulation.....	135
Theoretical Triangulation.....	136
Participant triangulation.....	136
<b>Ethics, the PsyBA National Exam and Psychometrics .....</b>	<b>139</b>
<b>SUMMARY VALIDITY AND RELIABILITY .....</b>	<b>140</b>
<b>SUMMARY Reading EEG scans .....</b>	<b>144</b>
<b>    Frequency.....</b>	<b>144</b>
Alpha waves.....	145
Beta waves .....	145
Theta waves.....	145
Delta waves.....	145
<b>    Morphology.....</b>	<b>145</b>
K complex.....	146
V waves.....	146
Lambda waves.....	146

Mu waves - Wicket rhythm or rhythm en arceau .....	147
Spikes and sharp waves.....	147
Benign epileptic transients of sleep .....	148

## INTRODUCTION
