- 1.5. Financing and financial plans*
- 1.6. Business plan writing and consulting*

Module 2 : Company Accounting

- 2.1. Business Combination*
- 2.2. Purchase Consolidation 1 (Direct acquisition of Assets and liabilities)*
- 2.3. Purchase Consolidation 2 (Consolidation process post-acquisition)*
- 2.4. Intra-group transactions*
- 2.5. Direct non-controlling interest and allocations*
- 2.6. Equity Accounting*

□ Week 1 : Introduction to Entrepreneurship

- **Entrepreneurship** : What it is
 - Activities of setting business(plans) and taking financial risks
 - Pursuing opportunities **without regarding to the resources under control** (Someone else's money!)
- **Empirical evidences of entrepreneurship**
 - Case Study of Mahaweli, Sri Lanka → Households with **Entrepreneur/Management skills** have become successful
 - **Entrepreneur Skills** : 1) Use of **non-owned resources** 2) Use of **relationships**(networks) 3) **Delayed Consumption**
 - **Managerial Skills** : Efficacies in **allocating resources** (Using time/resources in the most efficient/effective way)
- **6 Elements of successful entrepreneurship**
 - 1) **Profit oriented**
 - 2) **Honesty**
 - 3) **Qualified**
 - 4) **Thorough**
 - 5) **Commitment**
 - 6) **Flexible**
- **Business Plans** : Why?
 - Entrepreneurship is based on the creation of benefits from resources that are **NOT** under control
 - Assuring of **certainty** → **Efficacy of planning improves** as the data/information become more **reliable**
 - 3 primary functions of business plans → 1) **Symbolism** 2) **Learning** 3) **Efficiency**
 - = 1) **Symbolism** : Symbolises the **commitment** / that the business & its people are reliable for the stakeholders
 - = 2) **Learning** : Facilitation of **deeper understanding** towards the market/ventures
 - Components of a business plans
 - 1) **Executive Summary** : An introduction / overview of the business
 - 2) **Business Opportunity** : Industry analysis (Mega-trends : Sustainability.. / Competitors / SWOT)
 - 3) **Sales and marketing strategy** : 4P's (Product, Price, Place, Promotion)
 - 4) **Operational strategy** : Management personnel & supplier information / operational risks disclosure
 - 5) **Financial plans** : Profit/loss forecast, Capital Structure forecast, Capital budgeting, Initial capital requirement
- **Elements of successful business plans**
 - **Feasibility** : Are the plans based on **realistic** assumptions?
 - **Financial resources** (Financing decisions) : How to **procure the capital** required?
 - **Securing of debts** (Solvency matters) : How to **pay the external creditors**?
 - **Human resources** : Having the **right number of right people**
 - **Business relationships** : Managing value chain networks from **suppliers to the customers**
 - **Operational plans** : How to successfully manage the **day to day operations**?
- **Key aspects of a business plan**

□ Equity Accounting

· Equity Accounting : AASB 128

- Measurement and recording of **changes** in the investments in **associates; subsidiaries' post-control equity**
- Recognising the relationships based on the indication of **control** and the **significant influence**
- **Two methods** : **Cost** method VS **Equity** method
- **Primary concerns** : 1) **Initial Recognition** of the investment 2) **5 Subsequent changes** in the equity
- **New account** : **Investment to the associates** (Asset); **Revenues from the associates** (P/L)

· Significant Influence VS Control

- **Control** : **Parent-subsidiary** relationship; Power to **'Govern'** the **financial and operating policies** for **own benefits**
 = When **shares owned greater than 50%**; **'Presumed'** to be a parent company
 = **Equity accounting** → **Cost method** for the **investor's own F/S**; **Equity method** for the **consolidated F/S**
- **Significant influence** : **Investor-associate** relationship; Power to **'Participate'** in the **decision-making process**
 = General indication is **presumed** when **shares owned 20% < x < 50%**
 = **NOT** a conclusive factor; considering **other facts that impose the intention** of the investor
 = **Equity accounting** → **Equity method ONLY** in the investor's financial statements

· Cost Method VS Equity Method

- There are **NO** differences during the **initial recognition stage** (Investment in associates / Cash)
- **Changes** arise **during the subsequent changes** in the equity
 = **Equity method** : **Changes** recognised in the **"Investment in associates"** account
 = **Cost method** : **Changes** are **NOT** recognised in the **"Investment in associates"** account

· Equity accounting : 2 Easy Steps

- 1) **Initial Recognition** : **Acquisition** of the **associates' equities** to the significant interest
 = Value recognition is same as the subsidiary control; **FVINA – FV** Consideration
 = **Goodwill** is calculated but **NOT recognised**; simply **disregarded** (Criticisms to AASB128)
 = **Bargain Purchase Gain** is recognised as **part of the associates' next P/L**
 = Same entries for both Cost & Equity methods

Date	Transaction	Dr	Cr
30/06/16	Investment in Associates	10,000	
	Cash at Bank		10,000
	(Initial recognition of the associates' shares acquired)		

Figure 12.1) Equity accounting – Initial recognition; recognition of associate's equity

- 2) **Subsequent Changes** : **The 5 different 'elements'** that impose changes in the associate's equity
 → **NET Profit / Dividends / Post-acquisition equity changes / Intercompany profits / Investment impairment**

2.1) NET Profit of the associates

- = **Increment of investment values** as the associate's total equity increase
- = **Equity method** → as described in 12.2.1; **NO** entry for the **cost method**

Date	Transaction	Dr	Cr
30/06/16	Investment in Associates	3,000	
	Revenues from the Associates		3,000
	(30% owned associate; NET Profit \$ 10,000)		

Figure 12.2.1) Equity accounting – Subsequent changes; Recognition of profits of the associates
