

PSY3041: PSYCHOLOGICAL TESTING, THEORIES OF ABILITY AND ETHICS

CONTENTS

PSY3041: Psychological Testing, Theories of Ability and Ethics	1
Reading summaries	6
Week 1	6
Ethics	6
Ethical Traps	6
The Ethical Hierarchy	7
Ethical Decision-Making Process	7
Week 2	8
Psychological Tests	8
Psychological Assessment	9
Types of Psychological Tests	10
Administering a Test	10
Scoring a Test	10
Interpreting the Results	10
Communicating the Findings	11
Culture in Psychological Tests	11
Week 3	11
Reliability	11
Validity	12
Content Validity	12
Predictive Validity	13
Construct Validity	14
Factor Analysis	14
Week 4	14
The Rational-Empirical Approach	14
Specification of the Attribute	15
Literature Search	15
Choice of a Measurement Model	15
Item Writing and Editing	16
Item Analysis and Selection	16

Publication	16
Week 5	17
IQ (Intelligence Quotient)	17
Concept of Intelligence	17
Intelligence Tests and Scales	17
Different Views on Intelligence.....	18
Week 6	19
Gender in Schools	19
The Smarter Sex.....	19
Sex Differences Across the Lifespan	20
Sex Differences Over time	20
Race as a Construct	22
Intelligence as a Construct.....	22
Week 7	22
Forms of Assessment	22
Group Administered Achievement Tests.....	23
Constructed Response Tests.....	23
Individually Administered Achievement Tests.....	23
Teacher-Constructed Tests	24
Aptitude Tests.....	24
Behaviour Rating Scales.....	24
Week 8	25
What Is Clinical Neuropsychology	25
Neuropsychological Assessment	25
Functions Commonly Assessed.....	26
Week 9	27
Personality Assessment.....	27
The Psychoanalytic Approach	27
The Interpersonal Approach	27
The Personological Approach.....	28
The Multivariate Trait Approach.....	28
The Empirical Approach.....	28
The Social-Cognitive Approach	29
Positive Psychology	29

Eclectic Psychology	29
Week 10	29
Clinical Mental Health Testing and Assessment	29
Psychological Tests	30
Psychopathology	30
Psychological Report	31
Week 11	31
Performance Appraisal	32
Theories of Appraisal	33
Personnel Selection	33
Selection as a Social Process.....	34
Some tests Used In Selection.....	34
Work attitudes.....	35
Week 12	35
Forensic Psychology.....	35
Settings of Forensic Assessment.....	36
Malingering	36
Lecture notes	38
Week 1	38
Ethics.....	38
Morals vs Ethics.....	38
Ethics in Psychology	38
Ethics Code and Guidelines.....	39
Ethical Dilemma	39
Approaches to Ethics	39
Key Principles in Ethics.....	40
General Principles	40
Ethical Traps.....	41
Model for Ethical Decision Making.....	42
Week 2	43
Fundamentals of Psychological Testing.....	43
Responsibilities Associated with Psychological TEsting	44
History of Testing	45
Culture in Psychological testing	46

Testing vs Assessment	46
Assumptions of Testing and Assessment	47
Statistics	47
Week 3	49
Reliability and Validity	49
Classical Test Theory	49
Reliability	51
Validity	52
Week 4	55
Test Conceptualisation	55
Test Construction.....	57
Test Tryout.....	60
Item Analysis	60
Test Revision	63
Week 5	64
Intelligence.....	64
Theories of Intelligence.....	65
Nature vs Nurture	67
Measurement of Intelligence.....	67
Week 6	69
Fluid and Crystallized Intelligence	69
Cross-Sectional Vs. Longitudinal	70
Intelligence and Gender.....	71
Intelligence and Culture/Race.....	72
Test Bias.....	73
SES Effect of Stability Of Intelligence	73
Beyond the Norms	74
Intellectual Disability	74
The Intellectually Gifted	75
Week 7	76
The Role of Educational Testing.....	76
Identifying Specific Learning Difficulties.....	77
Diagnosing Specific Learning Disabilities	77
Types of Educational Tests.....	78

Other Forms of Assessment	79
Week 8	80
What Is Neuropsychology?	80
Neuropsychological Constructs	81
Role of a Clinical Neuropsychologist.....	81
Neuropsychological Assessment	82
Assessment Process	83
Paediatric Neuropsychology	86
Week 9	87
Personality	87
What is Assessed?	89
Strategies of Personality test Construction	89
Personality Tests	90
Week 10	92
Clinical Psychology	92
The DSM and Diagnosis	93
The Clinical Interview.....	95
Clinical Tests and Screening Tools.....	97
Special Applications of Clinical Measures.....	97
The Psychological Report.....	98
Week 11	99
Industrial-Organisational Psychology.....	99
Career Choice.....	100
Application Banks and Interviews	100
Selection Tests	101
Week 12	104
Forensic Psychologists	104
Settings and Typical Assessments in Forensic Psychology.....	104
Judicial Decision Making.....	105
Therapeutic Forensic Psychology	107

READING SUMMARIES

WEEK 1

ETHICS

A set of principles for guiding behaviour;

- In the case of psychological testing and assessment, for guiding professional behaviour

Attempt at self-regulation by a group of professionals

More careers may have been damaged by a lack of ethical knowledge than a lack of technical knowledge

Ethics vs legalities;

- It is important to consider that behaviour may be considered unethical even though it may not be illegal

ETHICAL TRAPS

Ethical trap 1: The “Commonsense, Objectivity” Trap;

- “Commonsense, objective solutions” to professional ethical dilemmas are always easy to come by because helping professionals are basically ethical people and they will use this trait as a satisfactory guide when they face any ethical dilemma
- A trap because;
 - o Decisions that appear to be based on ethical considerations must be guided by the law;
 - Confidentiality/privacy rights
 - Treatment of minors
 - o Objectivity is difficult to achieve in real-life situations;
 - Helping professionals are automatically personally involved in the client’s situation and bring their own human experiences with them
 - People bring their own sense of reality (including its flaws) to their ethical decision making;
 - Can lead to inappropriate and potentially harmful resolutions
- Personal biases;
 - o We make generalizations from past experiences that we then apply to the next one
 - o We can often learn the wrong thing from past experiences and therefore make the wrong generalizations

Ethical trap 2: The “Values” Trap;

- Confusion on the part of helping professionals about what professional ethical codes are and are not
- Often what is required of helping professionals by their professional ethical codes may seem to conflict with their own personal values, moral standards or religious convictions;
 - o E.g. a religious person against divorce may have to encourage a married couple to separate if the relationship is toxic

Ethical trap 3: The “Circumstantiality” Trap;

- The belief that there are no “right” or “wrong” answers to any ethical questions because the circumstances under which they occurred must be taken into consideration rather than the behaviour itself
- BUT behaviour often IS right or wrong based on professional ethical standards, regardless of the circumstances in which it occurred.

Ethical trap 4: The “Who Will Benefit” Trap;

- Confusion about who will benefit from a specific ethical decision
- There is often a ‘winner’ and a ‘loser’ when making a decision;
 - o Sometimes taking sides from among two or more conflicting interests is necessary
- Long vs short term interests need to be considered

THE ETHICAL HIERARCHY

The professional

Society

The client

ETHICAL DECISION-MAKING PROCESS

Problem identification;

- Decision-making process can't begin until a problem has been identified
- Four most common ethical violations;
 - o Dual relationships
 - o Breaches of client confidentiality
 - o Attempts to provide treatment beyond the scope of an individual's professional competence
 - o Failure to take appropriate steps to prevent suicide attempts

Step 1: Identify the Ethical Standard Involved;

- Find out if a code covers the situation
- Consult with a colleague or supervisor
- Check legal requirements

Step 2: Determine Ethical Trap Possibilities;
