Prohibition	
Certiorari	44
For prohibition and certiorari: decision/action to be prohibited/quashed must have discernible legal	
effect on rights: Hot Holdings	44
Mandamus	45
Orders for non-jurisdictional error by HC in Constitution s 75(iii) OR by FC in Judiciary Act s 39B(1A)(c)	46
Certiorari for non-jurisdictional error on the face of the record	46
Declaration and injunction (equity)	47
Habeas corpus	48
Remedy by FC under ADJR Act	49
Remedy by NSWSC	50
Crown immunity? (scarcely exists anymore)	51
COURT HAS DISCRETION TO REFUSE AVAILABLE REMEDY	52

Substantive conditions

Failing to apply correct test OR to apply the correct test correctly

Decision-makers must apply the correct test prescribed by statute, and apply the test correctly: <u>Melbourne Stevedoring</u> (see below)

Meaning of statute is determined by the reviewing court's own statutory construction — no deference to administrator: <u>Enfield</u>

Court determines meaning of legal word by its own statutory construction: May

• Where meaning of word is **sensitive to syntax and context** of statute -> **question of law** to be determined by text, context, purpose of statute

No evidence for finding of fact

Melbourne Stevedoring

Here, subjective jurisdictional fact = power to cancel employer's registration if Stevedoring Industry Board **is satisfied that employer is unfit to be employer**

- Must correctly understand the test prescribed by statute AND correctly apply it
- OR cannot base finding on NO evidence
 - Mere insufficiency/inadequacy of evidence is not sufficient
 - Unless it implies that Board incorrectly understood test or applied incorrect test)
- -> Here, NO probative evidence for finding that employer was unfit
 - Board relied on evidence of a few failures to report absence of workers (in extensive business)
- AND applied incorrect test exercised power NOT due to unfitness BUT to enforce obligation to closely supervise workers

<u>Holden</u>

- <u>Melbourne Stevedoring</u> applies to appeals on **question of law** generally
- Inadequate or thin evidence suffices
- Here, Administrative Appeals Tribunal's finding that Holden's PTSD was a disorder of sufficient severity to warrant ongoing management was based on evidence: e.g., clinical notes adduced to Tribunal
 - \circ $\;$ Notwithstanding that Tribunal did not refer to this evidence in reasons

Viane

NO evidence = not a skerrick of evidence

BUT finding can be based on Minister's **personal or specialised knowledge** OR based on **common knowledge** — this can be assumed

- Here, where no evidence supporting Minister's findings re speaking of English and availability of services in Samoa -> it could be assumed that findings proceeded from Minister's personal/specialised knowledge
 - **Obvious inference** because of the **store of knowledge** that Minister would have developed over many years dealing with foreigners
 - Notwithstanding that Minister's reasons did not expressly state that he was relying on personal knowledge; and that these matters were not commonly known, and thus less likely to be personally known
- BUT obiter: If **applicant adduced evidence** -> Minister would need to consider such evidence and, if necessary, answer it with further or different evidence
 - BUT here, applicant did NOT adduce evidence re these matters
- ... AND OBITER: Minister may draw from accumulated knowledge of their department

OBITER: In extreme, rare cases — Minister may make findings which could NOT have been based on evidence or their personal/specialised knowledge or common knowledge — may be based on representations which are no more than **bare assertions about course of future events**

E.g., findings re **danger that applicant may pose in the future** to Australian community; re **type of hardship applicant might personally suffer if deported**

Failing to have regard to relevant considerations

Peko-Wallsend

- Consideration is only relevant if administrator was legally obliged to take it into account
- Determined by statutory construction
 - If <u>expressly</u> stated (e.g., Minister shall/must have regard to ...) -> court decides whether factors are exhaustive or inclusive
 - o Otherwise, must be **implied** from **subject-matter**, **scope**, **and purpose of statute**
 - Weight given to each consideration is decided by decision-maker
 - BUT if weighting is inappropriate, could amount to unreasonableness
- Broader policy considerations are relevant to Minister -> must be considered
 Unless policy is unlawful (see 'Policy')

-> Here, Minister granted land rights based on departmental report which did NOT refer to information re detriment to Peko

• Implied from statutory requirement that Commissioner comment in his report to Minister on detriment caused by land rights that Minister is bound to consider detriment

... AND considering relevant consideration must be based on most recent and accurate information that Minister has within their actual and constructive knowledge

• Minister's constructive knowledge can include knowledge of Minister's department (as here)

-> Minister was bound to consider Peko's submissions

Where statute expressly stipulates considerations — exclusive or inclusive? Plaintiff S156

- Statute: 'The <u>only condition</u> for the exercise of the power' is that Minister thinks it is in the national interest
- -> Cannot imply other considerations (e.g., AUS' and processing country's international law obligations, possibility of indefinite detentions)

Minister is not obliged to personally consider it (depends on legislative scheme): McQueen

- Here, legislative scheme required Minister to consider representations made by applicant

 > BUT it did NOT follow that Minister was obliged to personally read original
 representations because
 - **NO express/implied statutory requirement** that Minister *personally* consider applicant's representations
 - Because Minister's functions are so extensive -> administrative necessity for Minister to rely on department's summary
- -> Where it is **appropriate to summarise representations** and **summary is accurate** and provides full account of essential content -> lawful for Minister to only read summary
 - Department's behaviour is attributed to Minister -> Department must consider relevant considerations
 - Level of consideration that must be given to relevant consideration (by Minister or delegate) = read, identify, understand, and evaluate
- Department gave Minister 13-page submission summarising applicant's representations -> sufficed

Having regard to irrelevant considerations

Irrelevant consideration = consideration that the decision-maker is legally obliged NOT to take into account: <u>Murphyores</u>

- Depends on the statute express limitations on power (e.g., specific enumeration of relevant matters) OR implications from subject-matter of power
- Here, statute gave power to prohibit exports of goods
- NO express limitations on power
- Wide powers over wide range of goods -> implies no limitations
 - Reasons for prohibiting goods may be various as the goods themselves
 - \circ $\,$ Character of some goods is inconsistent with concept that considerations must be confined to trade and commerce
 - E.g., historical/anthropological goods; weapons of war
 - Unrestricted export of goods may produce wide variety of effects (incl. on environment)
- When such a breadth of considerations is involved -> only something amounting to lack of bona fides could justify judicial intervention
 - Corrupt OR entirely personal/whimsical considerations -> irrelevant
- -> Minister could consider environmental impact of mining operations to decide whether to allow export of minerals
 - Sufficed that environmental considerations were bona fides (NOT corrupt/personal/whimsical)
 - o AND Minister was required by ancillary legislation to consider environment

Minister is NOT allowed to exercise discretion in a way that would **thwart or run counter to** statute's policy and objects:

• Determined by construing statute as a whole

Here, Minister refused to refer appellants' complaint re price fixing for milk and request for investigation to committee — based on **irrelevant considerations**

- Purpose of statute: to establish milk-marketing scheme
- Complaint was unsuitable because it raised wide issues -> irrelevant
 - Section 19(6) contemplates raising issues so wide that Minister would have to amend or revoke scheme -> <u>implied intention of statute that even complaints</u> <u>calling entire scheme into question should be investigated</u>
 - Section 19 is the only method to investigate wide issues
- Complaint should be resolved through **other arrangements** -> irrelevant
 - Statute imposes responsibility/duty on Minister to address such complaints
 - To avoid **political embarrassment** to Minister -> irrelevant • Held: 'plainly ... a bad reason'

· · ·

Acting for an improper purpose

Proper purpose may be **expressly stated** OR **implied from statute's subject-matter and scope** (<u>Toohey</u>)

Where administrator's only purpose was improper

<u>Toohey</u>: Powers conferred by <u>Planning Act</u>, when read with definition of 'town' (= land specified by regs. to be treated as town), are to be exercised **ONLY for planning**

- Crown's representative (here, Administrator of NT) is NOT immune from JR • Here, exercising statutory powers — NOT prerogative of Crown
- Administrator declared area far larger than Darwin as town of Darwin to defeat Aboriginal land rights claim in that area -> improper purpose

Where administrator acted for proper AND improper purposes — ground satisfied if improper purpose was substantial purpose (<u>Thompson</u>)
